iBeacons

We offer all the necessary tools for indoor positioning and navigation so you can easily see co-workers current position and position history.

POC devices

Danimex offers a wide range of POC (Push-to-talk over cellular) solutions with features that include location tracking, job ticketing, group and individual calls and more.

Our POC applications provide full integration of smartphones with your business needs whether that is a standalone solution or as an extension to your PMR network (Private Mobile Radio) platform over 3G, 4G, WiFi or LTE.

Cambium cnMaestro™

A cloud-based or on-premises software platform for secure, end-to-end network control.
